DCM-25
High Security Vertical Pivot Gates

Durable, Secure Commercial Entryways

DCM-25 115 volt AC with DC battery backup

Tilt-A-Way vertical pivot gates are designed to meet the security and aesthetic objectives for all commercial security requirements. Engineered to withstand severe weather and high winds, Tilt-A-Way represents the unparalleled security expertise and commitment to quality required by discriminating installations such as airports, military, FAA, municipalities, nuclear plants, courthouses, gated communities, mini storages, and residential properties.
Dedicated Performance

It Costs Less To Buy The Best! IDEAL’s custom design services and “satisfaction guaranteed” policy ensure that each Tilt-A-Way Vertical Pivot Gate provides years of effortless, low maintenance operation with no belts that slip and need continuous adjustments.
